

Lumban Sopian

CISO | Head of DevSecOps & Cloud Platform | Security & Platform Executive

Tangerang, Indonesia | lumban.sopian@msn.com | +62-821-2242-8287 | linkedin.com/in/lumbans

PROFESSIONAL SUMMARY

Security and Platform Executive with 18+ years of leadership delivering secure, scalable, and compliant technology platforms in regulated banking and fintech environments. Expert in cloud-native and hybrid architectures across AWS and GCP, embedding security-by-design, Zero Trust (NIST SP 800-207), GitOps, and compliance automation into Software Development Lifecycle (SDLC) and CI/CD pipelines supporting mission-critical, high-availability systems. Proven track record leading 50–70+ cross-functional teams across Security, DevOps, Cloud, and IT Governance. Provides board-level security reporting, owns security budget planning, and manages strategic vendor relationships. Experienced in Security Operations Center (SOC) oversight, threat intelligence, penetration testing governance, and Business Continuity Planning (BCP/DR). Achieved 40% reduction in security incidents, 30% cloud cost optimization, 50% Mean Time to Recover (MTTR) improvement, and sustained 99.95%+ service availability.

CORE COMPETENCIES

Security Leadership & Governance

- DevSecOps & Platform Engineering • Zero Trust Architecture (NIST SP 800-207) • Cloud Security Posture Management (CSPM)
- Security Operations Center (SOC) Oversight • Threat Intelligence & Hunting • Penetration Testing Governance
- Vulnerability Management • Security Information and Event Management (SIEM) • Data Loss Prevention (DLP)
- Identity & Access Management (IAM) Governance • API Security • Incident Response & Forensics
- Business Continuity Planning & Disaster Recovery (BCP/DR) • Board-Level Security Reporting • Security Budget Ownership

Cloud & Infrastructure

- Cloud Architecture (AWS, GCP) • Kubernetes (EKS/GKE) • Infrastructure as Code (Terraform, CDK)
- CI/CD & GitOps Automation • Site Reliability Engineering (SRE) • FinOps & Cloud Cost Governance

Compliance & Risk

- ISO/IEC 27001 • PCI-DSS • OJK / Bank Indonesia Regulatory Compliance • NIST SP 800-207 • Risk Appetite Frameworks
- Vendor Management & Negotiation • IT Governance • Audit Readiness Automation

PROFESSIONAL EXPERIENCE

CISO / Head of Information Security & Application Management | Nov 2023 – Present

PT Bank Multiarta Sentosa Tbk • Jakarta, Indonesia

- Executive governance across Information Security, DevOps, QA, IT Governance, and Risk & Compliance; led 40+ cross-functional staff with full budget ownership and board-level security reporting.
- Architected Zero Trust security model (NIST SP 800-207) across AWS-based distributed systems; integrated policy-as-code into CI/CD pipelines and automated compliance controls aligned with SDLC.
- Achieved zero critical findings across 3 consecutive OJK/regulatory audits through proactive compliance automation, audit readiness frameworks, and risk appetite governance.
- Drove 40% reduction in security incidents via threat detection improvements, Identity and Access Management (IAM) governance, network segmentation, Cloud Security Posture Management (CSPM), and Security Operations Center (SOC) enhancements.
- Established threat intelligence program and penetration testing governance, reducing attack surface and improving proactive vulnerability management.
- Defined enterprise DevSecOps strategy supporting digital banking transformation and sustained 99.95%+ service availability across all production systems.

Principal DevOps Engineer | Oct 2022 – Sep 2023

Lyte Ventures Pte. Ltd • Singapore

- Designed and implemented multi-region AWS architecture for scalable high-growth digital platforms serving enterprise customers; managed team of 12 engineers with \$1.5M+ annual infrastructure budget.
- Provisioned and managed 600+ cloud workloads using Terraform and AWS CDK, standardizing Infrastructure as Code (IaC) and GitOps practices across the organization.
- Deployed Kubernetes (EKS) clusters with auto-scaling, high availability, and service mesh (Istio) integration for microservices workloads.
- Reduced cloud infrastructure costs by 30% through FinOps governance, resource right-sizing, and reserved instance optimization.
- Implemented full observability stack : Prometheus, Grafana, ELK Stack, Datadog, with Service Level Objective (SLO) / Service Level Agreement (SLA) tracking for proactive production monitoring.

Head of IT Infrastructure & Service Management | Oct 2021 – Sep 2022

Bank Jago • Jakarta, Indonesia

- Led 20+ engineers in cloud infrastructure modernization and disaster recovery (BCP/DR) architecture meeting strict OJK Recovery Time Objective (RTO) / Recovery Point Objective (RPO) requirements.
- Implemented endpoint security and Data Loss Prevention (DLP) across 500+ devices, significantly reducing organizational attack surface.
- Designed secure network architecture with segmentation and workload isolation across all production environments.
- Standardized IT governance and operational processes, improving audit readiness and cross-team delivery consistency.

VP, DevOps Division Head | Aug 2019 – Oct 2021

PT Fintek Karya Nusantara (LinkAja) • Jakarta, Indonesia

- Managed 70+ engineers across DevSecOps and Site Reliability Engineering (SRE) functions; full accountability for \$5M+ annual budget, resource allocation, and performance management.
- Designed cloud-native CI/CD pipelines supporting millions of daily transactions on a nationwide fintech payment platform.
- Led large-scale migration to AWS, improving scalability, governance, and infrastructure resilience across the organization.
- Reduced Mean Time to Recover (MTTR) by 50% through incident management standardization, postmortem culture, and SLO/SLA frameworks.
- Sustained 99.95%+ uptime across all production systems serving national payment infrastructure.

DevOps Engineering Manager | Jun 2016 – Jul 2019

Grab • Jakarta, Indonesia

- Led 25-member DevOps team; migrated 600+ workloads from on-premise to AWS using Terraform and Ansible, improving scalability and security posture.
- Built CI/CD pipelines reducing deployment time from hours to minutes, enabling rapid and reliable engineering delivery at regional scale.
- Early adopter of Kubernetes for microservices platform scalability, improving reliability and operational efficiency across regional operations.

Earlier Career – Infrastructure & DevOps Engineering | 2007 – 2015

Progressive roles in Linux systems administration, infrastructure automation, CI/CD adoption, and early-stage cloud migration across enterprise environments.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, EKS, RDS, S3, IAM, VPC, CloudFront, Secrets Manager, API Gateway, CloudWatch) | GCP

Containers & Orchestration: Kubernetes (EKS, GKE) | Docker | Helm | Service Mesh (Istio)

Infrastructure as Code (IaC): Terraform | AWS CDK | Ansible | GitOps workflows

CI/CD & Automation: GitLab CI/CD | Pipeline automation | Policy-as-code | Continuous delivery

Observability & Monitoring: Prometheus | Grafana | ELK Stack | Datadog | CloudWatch | SLO/SLA tracking

Security Engineering: Cloud Security Posture Management (CSPM) | Zero Trust | Identity & Access Management (IAM) | Security Information and Event Management (SIEM) | Data Loss Prevention (DLP) | Vulnerability Management | API Security | Penetration Testing Governance | Threat Intelligence

Compliance & Governance: ISO/IEC 27001 | PCI-DSS | NIST SP 800-207 | OJK | Bank Indonesia regulations | BCP/DR

CERTIFICATIONS

- AWS Certified Solution Architect Associates – Amazon Web Services (2025)
- Certified Chief Information Security Officer (C|CISO) — EC-Council, USA (2025)
- AWS Certified Cloud Practitioner — Amazon Web Services (2022)
- Risk Management Level 5 — Banking Professional Certification Institute, Indonesia
- Risk Management Level 1 — Banking Professional Certification Institute, Indonesia

EDUCATION

Master of Business Administrations (In Progress) | *Expected 2027*

University of the People | California, USA

Master of Computer Science (In Progress) | *Expected 2026*

Binus University | Jakarta, Indonesia

Bachelor's Degree in Information Systems | *2024*

Nusa Mandiri University | Jakarta, Indonesia

Associate Degree in Information & Communication Technologies | *2007*

Bina Sarana Informatika University | Jakarta, Indonesia

Note: Senior leadership career spanning 18+ years was established prior to formal degree completion — a common pathway for technology practitioners in Indonesia.
